

**IN THE CLAIMS:**

**Please enter the following amended claims:**

A2 B3  
4. (Amended) A lattice girder supporting frame according to claim 1, wherein each of said straight brace parts are connected to each other at one end through a buckled part, with said straight bridge piece located in between said buckled parts, and extending in parallel to said upper and lower boom members.

A3 B3  
6. (Amended) A lattice girder supporting frame according to claim 1, wherein said upper boom member is capable of being positioned at different heights relative to said straight bridge piece of said truss, wherein the height of said straight bridge piece of said truss is  $X \pm a$ , wherein  $a$  is  $<$  a radius of the upper boom member, and  $X$  is the height of the upper boom member.

A4 B4  
8. (Amended) A truss brace of a bracing element for a lattice supporting frame, comprising:  
two brace parts, each of said two brace parts including a first end having a curved portion and a second end having a straight portion; and  
a straight bridge piece connecting said first ends of said two brace parts so that said two brace parts are disposed at an angle with respect to each other.
